Corporate Profile & Project Catalog

GÜNEŞ SP. Z O.O. provides end-to-end construction and electrical engineering services for industrial facilities, production plants, logistics centers, and large-scale infrastructure projects. Our expertise covers every stage of the project lifecycle — from planning and coordination to execution and commissioning.

About Us

GÜNEŞ SP. Z O.O. is an international construction and engineering company specializing in industrial electrical installations and large-scale infrastructure projects.

We operate across Europe, delivering reliable, high-quality solutions for factories, production plants, logistics centers, and complex industrial facilities. Our work combines engineering expertise, on-site coordination, and strict compliance with European standards.

With a strong focus on safety, precision, and efficiency, we support our clients from early planning stages through final commissioning. Every project is executed with a commitment to durability, performance, and long-term value.

Precision. Reliability. Engineering Excellence.

Our Services & Expertise

Industrial construction, mechanical, electrical and steel works across Europe.

We deliver comprehensive industrial construction solutions for large-scale projects across Europe.

Our expertise covers mechanical installations, electrical systems, steel construction, industrial platforms, piping, and infrastructure works. We work closely with international contractors and investors, ensuring every project is delivered with precision, safety, and full compliance with European standards.

With experienced teams, strong on-site coordination, and a results-driven approach, GÜNEŞ SP. Z O.O. is a reliable partner for complex industrial investments.

What We Deliver

GÜNEŞ SP. Z O.O. specializes in delivering complex industrial construction solutions for international clients. We execute projects with a strong focus on safety, efficiency, and technical excellence, ensuring long-term value for investors and partners.

- Industrial construction & infrastructure
- Mechanical, electrical & steel works
- Large-scale factory installations
- Cross-border project management

Reliable partner for industrial investments.

OUR PROJECTS

BMW Industrial Facility

Debrecen, Hungary

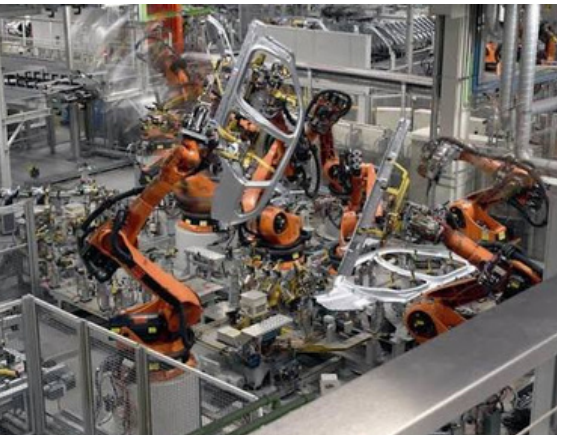

BMW Group

Synergy

2023
2024

GÜNEŞ SP. Z O.O. carried out construction and installation works within an automotive production facility in Debrecen, Hungary, operating under high technical and safety standards. The project required precise execution, strict compliance with site regulations, and close coordination with ongoing production activities.

All works were completed with a strong focus on quality, occupational safety, and operational continuity, ensuring seamless integration of construction activities within an active industrial environment.

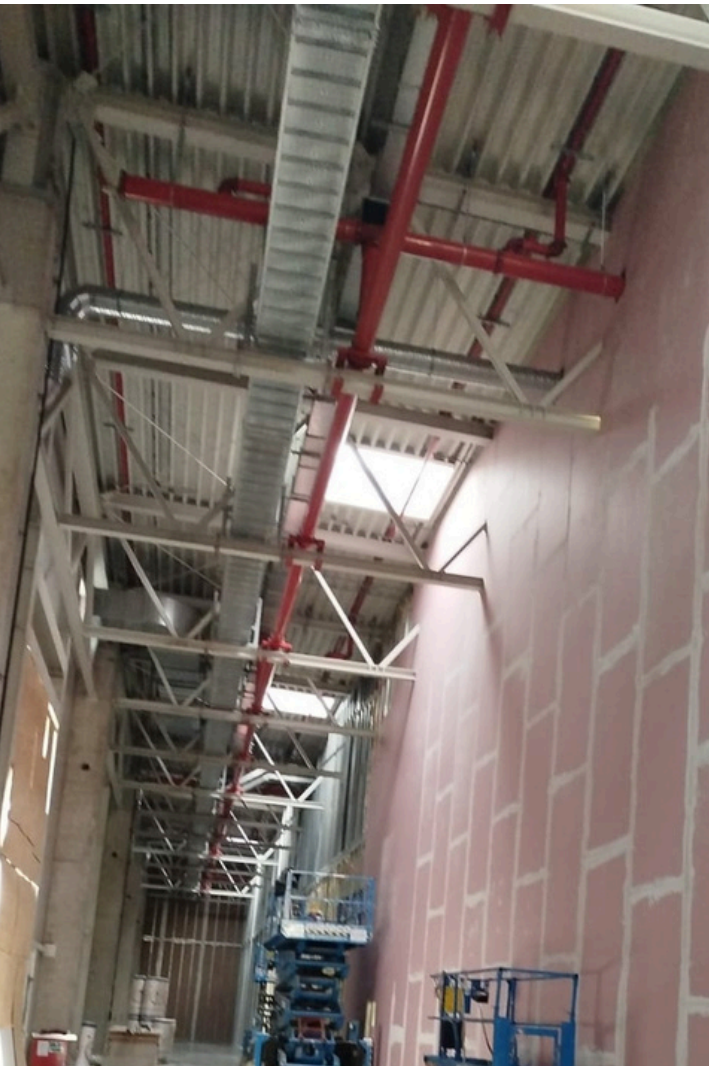

OUR PROJECTS

Olefins III Expansion Project

Płock, Poland | İLK İnşaat Taahhüt Sanayi ve Ticaret A.Ş. | 2023 2024

The Olefins III Expansion Project is a large-scale industrial investment carried out within one of Europe's major petrochemical production facilities. The project required precise coordination, strict safety procedures, and high technical standards due to the complexity of the industrial environment.

GÜNEŞ SP. Z O.O. contributed to the project by executing industrial construction works and supporting infrastructure activities in close coordination with the main contractor. All works were performed within an active production zone, requiring disciplined site management and full compliance with international industrial and occupational safety regulations.

The project was successfully completed within the defined schedule, ensuring seamless integration with ongoing operations and meeting the technical requirements of a high-demand industrial facility.

OUR PROJECTS

Şişecam Hungary

Kaposvár, Hungary

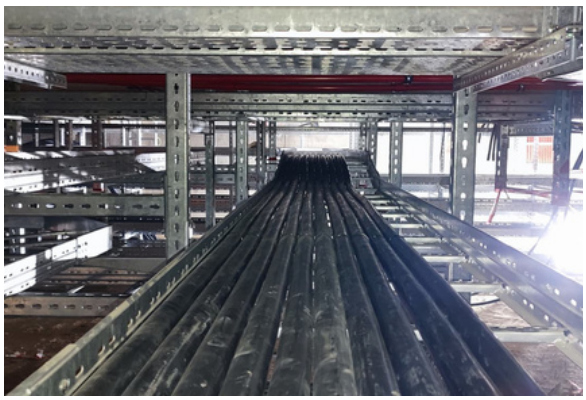

Doğuş İnşaat

2023
2024

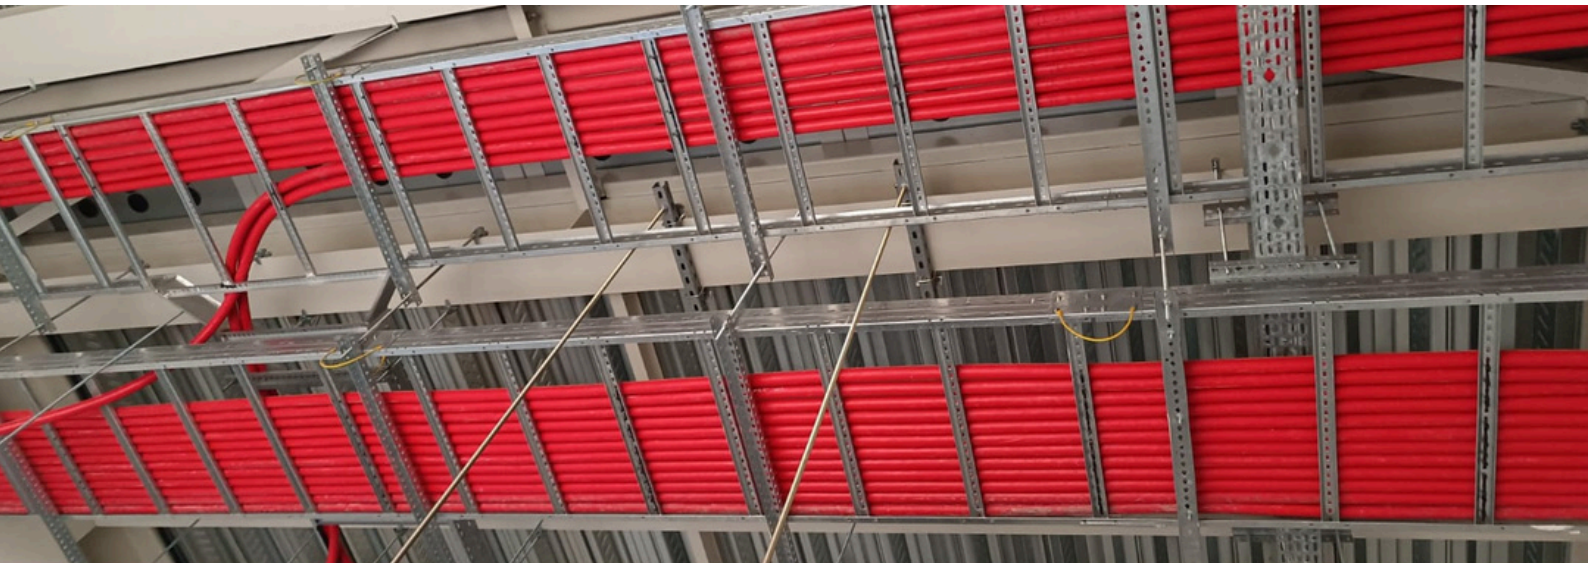

Electrical installation works were carried out as part of the Şişecam Hungary Glass Packaging Factory investment. The scope included electrical infrastructure installations supporting industrial production and technical areas.

GÜNEŞ SP. Z O.O. executed the works in compliance with international electrical standards and site safety requirements, ensuring reliable, safe, and efficient operation of the electrical systems within the facility.

Kaposvár, Hungary

Doğuş İnşaat

2023
2024

OUR PROJECTS

Şişecam Hungary

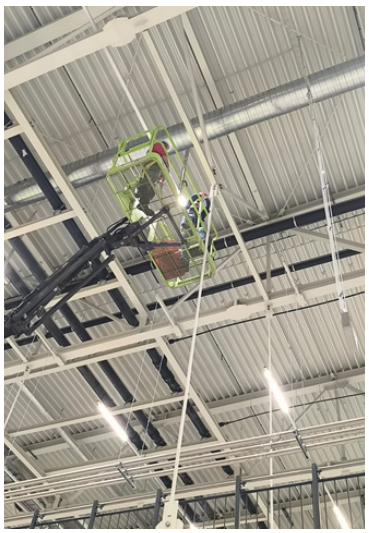

Hungary | KARCEL Demirçelik KFT | 2024 2025

Steel construction and industrial painting works were carried out within the scope of the Şişecam Hungary Glass Packaging Factory investment. The project included the installation of steel structures and protective coating applications suitable for industrial production environments.

GÜNEŞ SP. Z O.O. executed the works in compliance with safety regulations and quality standards, ensuring durable and long-lasting structural solutions for the facility.

OUR PROJECTS

Şişecam Hungary

Debrecen, Hungary

Birleşim Mekanik KFT

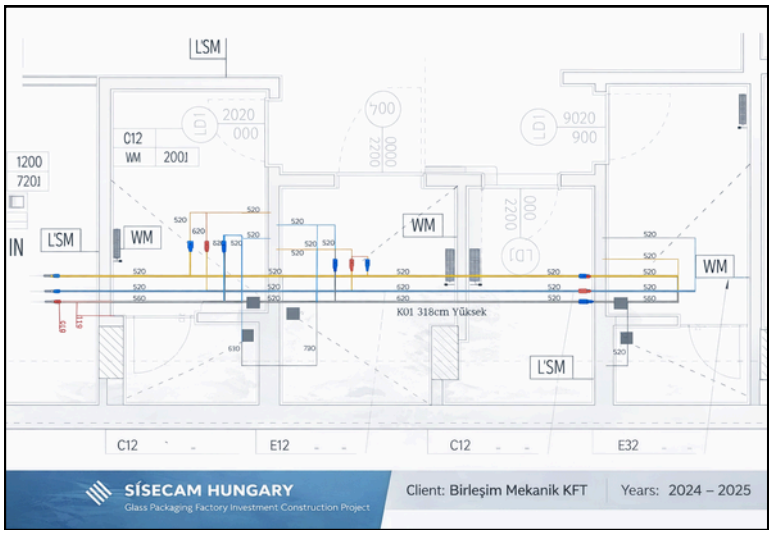

2024 2025

Mechanical installation works were carried out as part of the Şişecam Hungary Glass Packaging Factory investment. The scope included mechanical systems and infrastructure installations supporting industrial production and technical areas.

GÜNEŞ SP. Z O.O. delivered the works in compliance with project specifications and safety requirements, ensuring reliable and efficient operation of mechanical systems within the facility

OUR PROJECTS

Şişecam Hungary

Hungary | SYSTEM KFT | 2024 2025

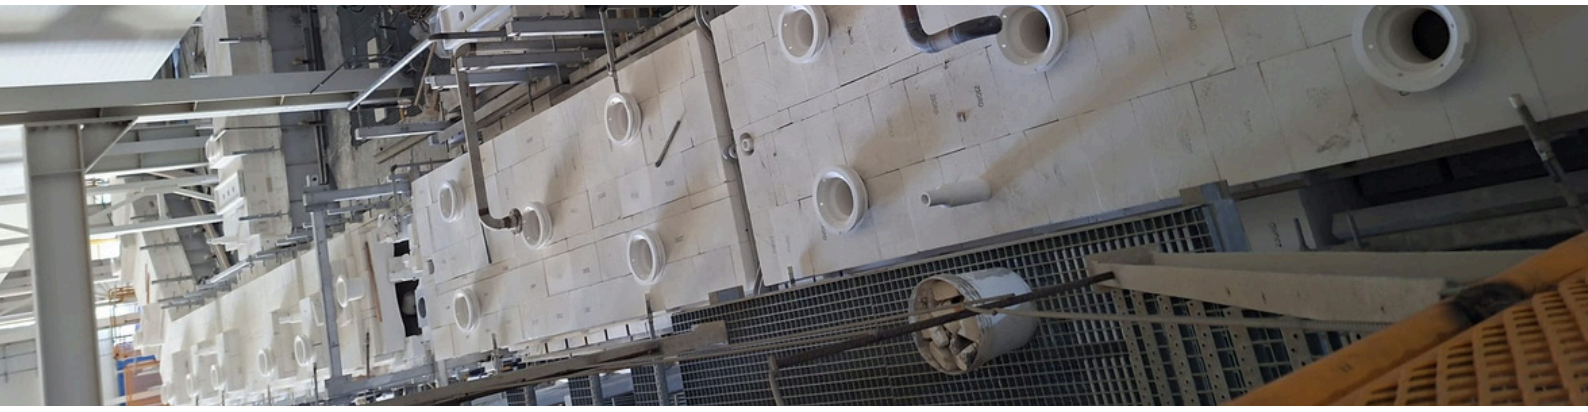

As part of the Şişecam Hungary Glass Packaging Factory investment, SYSTEM KFT successfully carried out the construction and installation of industrial chimney and exhaust systems for high-temperature glass production processes.

The scope of work included the installation of steel structures, industrial flue systems, exhaust duct routing, and integration with the main production lines. All works were executed in compliance with international safety standards, project specifications, and industrial regulations.

Key Works Performed

- Installation of industrial chimneys and exhaust lines
- Steel support structures and mounting systems
- Integration with furnace and production units
- On-site coordination with mechanical and electrical teams
- Compliance with industrial safety and quality standards

OUR PROJECTS

Şişecam Hungary Glass Packaging Factory Investment Construction Works

Hamburg, Germany

ARGE Uniper-ENKA Dradenau Uniper Technologies GmbH

ARGE Uniper-ENKA Dradenau Uniper Technologies GmbH

2025 2026

The plant operates with a combined-cycle configuration, utilizing advanced gas and steam turbine technology to maximize energy efficiency. Heat production is supported by multiple sources, including natural gas-fired systems and recovered waste heat from industrial and municipal processes.

Upon completion, the facility will deliver high-capacity electrical output and district heating, contributing to Hamburg's long-term energy infrastructure and sustainability goals.

OUR PROJECTS

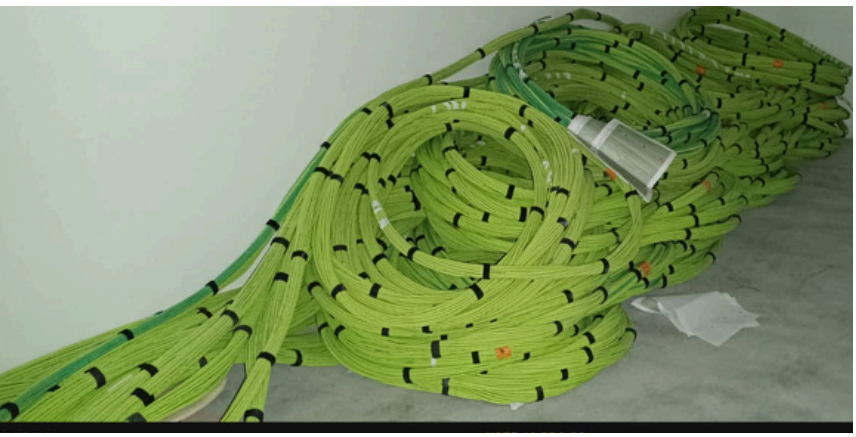

Hamburg University Project

Hamburg, Germany | MŚ Grup | 2024 2025

Within the scope of the Hamburg University project, MŚ Grup carried out construction and installation works for university facilities designed to meet modern academic and technical requirements.

The project focused on delivering high-quality construction solutions in an active educational environment, ensuring minimal disruption to ongoing university operations. All works were completed in accordance with German construction standards, safety regulations, and project-specific quality requirements.

OUR PROJECTS

Garwolin Municipality School Project

Garwolin, Poland | Comter Sp. z o.o. | 2025 2026

Dieses Projekt umfasste umfassende mechanische Montagearbeiten, die in einer aktiven industriellen Produktionsumgebung für Comter Sp. z o.o. durchgeführt wurden.
Der Leistungsumfang beinhaltete die Montage, präzise Ausrichtung und Integration mechanischer Systeme gemäß den Projektanforderungen, internationalen Normen sowie den geltenden Sicherheitsvorschriften vor Ort. Sämtliche Arbeiten wurden mit besonderem Fokus auf Genauigkeit, Koordination und den unterbrechungsfreien Betrieb der Anlage ausgeführt.

OUR PROJECTS

Prefabricated Housing Project

Le Mans, France

2026

The Le Mans Prefabricated Housing Project involves the construction and installation of modern prefabricated residential units designed for fast deployment, high quality, and long-term durability.

The project focuses on efficient off-site manufacturing combined with precise on-site assembly, ensuring reduced construction time while maintaining high architectural and structural standards.

OUR PROJECTS

Lommel Glass Factory Construction Project

Flanders, Belgium | Ciner Glass | 2026

GÜNEŞ SP. Z O.O. successfully completed the full electrical installation works for the Ciner Glass container glass production facility in Lommel, Belgium. The project covered comprehensive electrical infrastructure installations across the entire industrial complex.

All electrical systems were executed in accordance with European standards, ensuring safe, reliable, and efficient operation of production, utility, and auxiliary systems within the facility.
